

The GPA South Gippsland Immunisation Program is designed to assist in maintaining a percentage of fully immunised children above 90%.

The General Practice Immunisation Incentive scheme requires all Doctors to have completed a 46E form, to be lodged with Medicare by your Practice. This form need only be completed once and ensures that you will receive your overdue children Practice report.

Medicare SIP payments are made to individual Doctors (Immunisation providers) for reporting a vaccination to ACIR combined with another payment for giving all vaccines due at that encounter.

An additional PIP incentive payment is made to the Practice if their immunisation rate is above 90%. The National Immunisation Program

Schedule determines which vaccines are fully funded. (see attachment for funded vaccines available).

GPA provides information on correct vaccine management, clinical and vaccine administration issues and current changes to the current Schedule.
