

The General Practice Immunisation

Incentive scheme requires all Doctors to have completed a 46E form, to be lodged with Medicare by your Practice. This form need only be completed once and ensures that your practice will receive their "Children who are overdue for Immunisations " report.

A PIP incentive payment is made to the Practice if their immunisation rate is above 90%.

The National Immunisation Program Schedule determines which vaccines are fully funded.

GPA provides information on correct vaccine management, clinical and vaccine administration issues and current changes to the current Schedule.

Please contact Jo Hillbrick at the Division should you require any Immunisation resources.
